"The future of the Smart, Secure and Sustainable Power"

Abstract

Abstract:

"The UPS industry vision at Cemep is to be ahead of the digitalization wave that impacts our societies. With this presentation, you will learn how UPS industry sees its role moving to providing smart and secure power, in order to continue insure a more demanding digital society in terms of power quality for IT everywhere. This covers innovations regarding secured power architectures, more intelligent power management, but also new sustainable solutions in terms of distributed power generation and efficiency".
